

3 REASONS TO USE SWIFT®TAK 5730

OVER OTHER PAPER STRAW ADHESIVES

Swift®tak 5730 is a world leading paper straw adhesive. It is plasticizer-free, food safe, and has three-hour+ liquid resistance. It is suitable for corewinding and slot nozzle paper straw construction.

CONSISTENT MACHINING

Unlike competitors, Swift®tak 5730 is a consistent clean machining solution that requires no filtration, reducing downtime and improving paper straw manufacturer productivity. This allows you to produce more straws per shift and lower your cost per straw.

UNIVERSAL COREWINDING GRADE

Swift®tak 5730 is unique in its multipurpose capability. Validated on different papers, it can be used on a wide range of equipment like roller and slot nozzle applications with speeds >100 m/min. It is suitable for straight and bendy straws, which allows you to consolidate adhesive SKUs.

FOOD SAFE

Swift®tak 5730 is compositionally compliant with BfR XXXVI for direct food contact for consumer safety. The adhesive was formulated for maximum food safety and is plasticizer free and boric acid free.
